DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-10, in Paper No. 7 received August 22, 2003 is acknowledged. The traversal is on the ground(s) that the examiner has not met the statutory criteria and no burden would be imposed upon the Examiner to search all the Groups. This is not found persuasive because the minimal criteria has been reasonably met and a divergent search would be required that would impose a serious burden upon the examination process. Claims 11-29 are withdrawn from consideration.

The requirement is still deemed proper and is therefore made FINAL.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2, the acronym and "PRD" is not clearly defined.

Claim 4, the acronym and "OTR" is not clearly defined.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wallace et al., US 6,564,121.

Wallace discloses an electronic transaction system for medical products from cabinets 20 over a global communications network, e.g. claim 29. Official Notice is taken that it is common knowledge that medical products/devices are governed by various state/federal/international laws/regulations/screening processes and compliance with these laws/regulations/screening processes is to minimize commercial risk via contractual obligation is required if the product is to be marketed via direct sales. The tracking of sales is common knowledge in the product sales

art. To have provided the Wallace system to comply with the various state/federal/international laws/regulations/screening processes to minimize commercial risk would have been obvious to one of ordinary skill in the art. Doing such would provide common knowledge marketing/tracking business acumen with the system of Wallace.
